

Andrew Baillie

Content Creator & Engineer

Summary

Content creator, designer internal communications advisor and engineer with interests in helping people to communicate. Currently working on making better user experiences by creating interesting and dynamic content.

Education

Edinburgh, UK
Sep 10 - Jun 16

Heriot-Watt University — First, MEng Chemical Engineering with Oil & Gas Technology and a Diploma in Industrial Training

Experience

Edinburgh, UK
Sep 19 - Present

Scottish Water — Delivery Advisor, Int Comms

- Give advice to teams on how to communicate complex subject matters with the rest of the business.
- Create videos, podcast, events, magazines and internal news articles.
- Work closely with key stakeholders to identify technical information that needs to be communicated and use a variety of media and strategies to make this understandable to a wider audience.

Edinburgh, UK
Sep 17 - Sep 19

Scottish Water — Specialist Graduate

- Completed the graduate programme in which I took on different roles in the business every six months.
- Completed engineering designs at a partner consultancy.
- Engaged with stakeholders to solve user interaction problems resulting from poor processes.
- Designed content to assist in project scope and progress.

Edinburgh, UK
Sep 16 - Mar 17

Solid Form Solutions — Project Scientist

- Evaluated and troubleshoot a variety of client technical and operational issues, utilising a methodical approach to quickly and effectively resolve problems.
- Managed the introduction of new equipment, which required preparation of all necessary documentation, monitoring of progress and communication with stakeholders.
- Developed communication packs to deliver key results and updates to clients.

Macclesfield, UK
Sep 14 - Sep 15

Astrazeneca — Process Engineer

- Managed the manufacture of an early phase drug product, completing safety tests, communicating with GMP consultants and product suppliers.
- Used a series of lab experiments and data analysis to identify and resolve an active pharmaceutical ingredient processing issue.
- Developed effective solutions to unique scale-up challenges, using new software and tools.
